

VYOM VADODARIYA

B.Tech Artificial Intelligence Student | AI/ML | Intelligent Systems | Software Engineering
Bengaluru, Karnataka, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate at REVA University focused on practical AI/ML systems, AI agents, automation, and reliable software engineering. Hands-on experience designing simulation-driven systems, multi-agent workflows, computer-vision pipelines, knowledge-retrieval systems, and full-stack prototypes. Interested in AI products, research, intelligent automation, and emerging technologies.

EDUCATION

REVA University, Bengaluru — Bachelor of Technology (B.Tech), Artificial Intelligence | 2025–Present

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript | **AI/ML:** Machine Learning, Deep Learning, Computer Vision, AI Agents, Multi-Agent Systems, GraphRAG | **Frameworks:** React, Django, Streamlit | **Data/Systems:** Vector Databases, Knowledge Graphs, REST APIs, Simulation, Benchmarking | **Engineering:** Git, GitHub, Pytest, Modular Architecture

SELECTED PROJECTS

AutoSRE — Autonomous SRE Incident Response Benchmark & Simulation Platform (GitHub)

- Built a deterministic, stateful simulation platform for evaluating AI-driven incident detection, root-cause analysis, planning, remediation, verification, rollback, and postmortem workflows before production deployment.
- Designed a multi-agent architecture with investigation, RCA, planning, remediation, verification, and postmortem agents plus an independent safety pipeline covering risk, blast radius, budget, approval, and recovery checks.
- Implemented deterministic benchmarking across 12 incident scenarios; documented repository results report 100% RCA and 92% recovery for AutoSRE_v3 under the benchmark configuration.

Medhavi — Cognitive Infrastructure & Accelerated Learning System (GitHub)

- Designed a multi-agent learning system that converts qualitative reading data into a personalized knowledge representation and targeted learning curriculum.
- Architected React frontend and Django backend orchestration with vector-database memory and GraphRAG components for personalized retrieval and learning workflows.

FloodX — Flash Flood Risk & Early-Warning Prototype (GitHub)

- Developed a prototype focused on flood-risk assessment and early-warning workflows, with a modular architecture designed to evolve from rule-based logic toward ML-driven prediction.

LEADERSHIP & ACTIVITIES

IEEE TEMS, REVA University — Membership Head | Bengaluru

- Contribute to student innovation, professional development, entrepreneurship, and technology-management initiatives through IEEE TEMS at REVA University.
- Participate in technical events, workshops, innovation activities, and student-led technology initiatives.

AREAS OF INTEREST

Artificial Intelligence & Machine Learning • AI Agents & Automation • Computer Vision • Intelligent Systems • Quantum Computing • AI Products • Research & Innovation

ADDITIONAL PROJECTS & INTERESTS

OIL-SPILL: Satellite/SAR-based oil-spill detection and maritime intelligence system combining computer vision, drift simulation, and AIS correlation. |

Interests: AI/ML, Quantum Computing, Quantitative Trading, Automation, Entrepreneurship.
